

Group Life Insurance Info for Maryland Business

(also northern Virginia & the District of Columbia)

Using the strength and experience of our group life insurance markets we can offer affordable premiums to both large and small businesses throughout Maryland. Our group life insurance policies are term life policies and cover employees only while they are working for your business.

Employee benefits are an important factor to any business in hiring and retaining a good work force. Every Maryland business should review their employee benefit life insurance plan to ensure that this major expense continues to offer the highest quality life insurance protection.

We work with only the most experienced and dependable insurance companies in providing your large or small Maryland business with special services, including voluntary benefits (section 125 plans) that you and your employees can select and pay for on a pre-tax basis. We also will assist your benefit administrator in answering employees questions and requests.

Group term life insurance policy coverage is for a specified length of time. Beneficiaries will collect, usually tax free, the face value of the policy upon the insured (your employees) death. Term life insurance is an attractive option for a Maryland business wanting to offer exceptional employee benefits.
